What's "NEW" on the 2002 CD?

- Labour Force Estimates by Detailed Age Groups and Sex (CD1T01) - a new age group "45-64 years" has been added to the monthly and annual tables.
- Labour Force Estimates of Full and Part-time Students during School Months by Age Groups and Sex (CD0T03an) - new annual table - an 8-month average (January to April and September to December) of the existing monthly table CD0T03mm.
- Labour Force Estimates by Detailed Industry, Age & Sex (monthly & annual table of CD1T05) - age group dimension has been added and the NAICS two-digit industry groups now have estimates back to 1976 rather than 1987.
- Estimates of Hirings, Separations, Quits & Layoffs, by Sex and Age Group and Hirings by Class of Worker, Industry & Age Group (monthly & annual CD1T24 & CD 1T25) - removed from CD. A data quality problem has been detected in these series and tables will not be available pending further investigation.
- Labour Force by Age & Sex and Labour Force by Industry (monthly - CD1T47 and CD1T54) - seasonally adjusted monthly data has been revised going back three years (beginning January 2000) based on the latest seasonal output. Also, all the seasonally adjusted series have been reviewed for appropriateness, unique seasonal characteristics (such as moving or stable seasonality) and sampling errors associated with specific series that may change over time.
